

Platform Datasheet

Cost-effective. Customizable. Powerful.

Our customer-centric approach emphasizes scalability and simplicity by delivering a robust, budget-friendly solution, free from hidden costs and complexities.

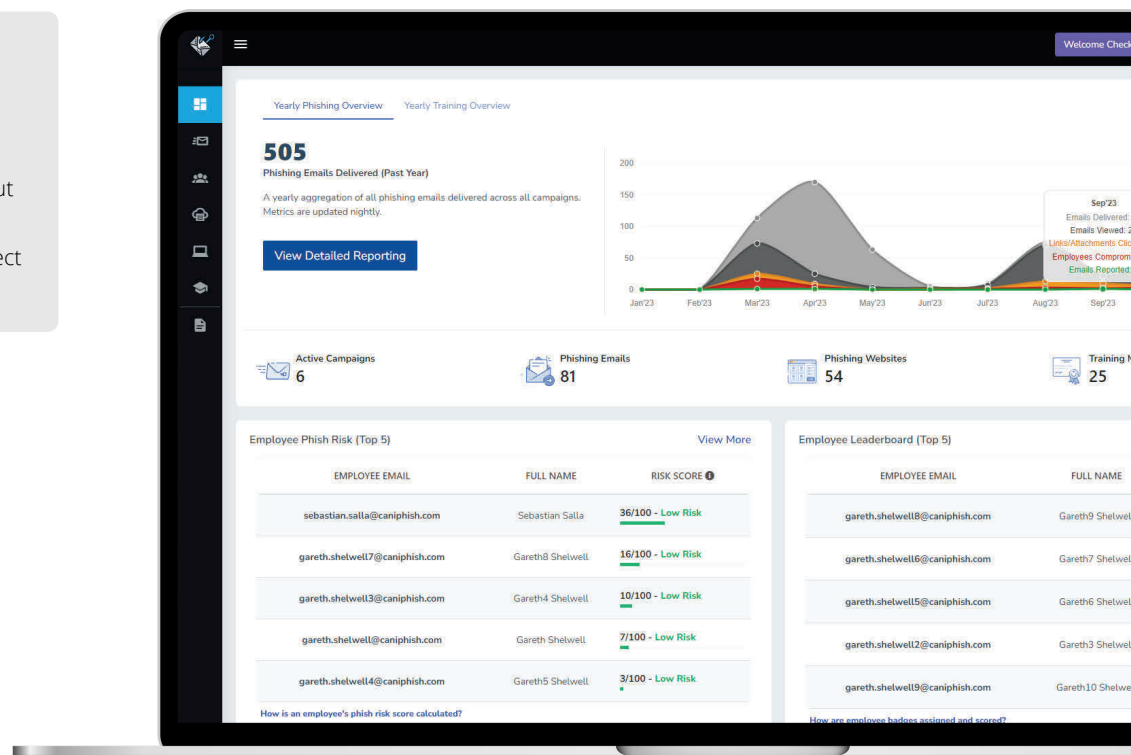

SEBASTIAN SALLA
CEO and Founder, CaniPhish

CanIPhish was founded with the goal of making cyber security training accessible to every organization. Our platform provides ultra-realistic phishing simulations and high-quality security awareness training, all at a fraction of the cost of our competitors.

We've eliminated the traditional aggressive sales approach and run a leaner business without an army of salespeople. We pass these savings to our customers. Our platform is our sales tool and it speaks for itself. We offer a well-equipped and perpetual free tier that is the perfect testing ground for anyone looking to get started.

Simulate Phishing Threats & Train Your Employees

Industry-Leading Features & Benefits

PLATFORM BENEFITS

Cost-Effective Security Awareness

Built from the ground up using a user-centric approach, CanIPhish combines comprehensive and powerful functionality with simplicity, efficiency, and affordability.

Transparent Pricing For Organizations Of All Sizes

Our commitment is to provide security awareness accessible to organizations of all sizes and budgets. We adopt a transparent pricing policy and let our platform's performance do the talking, eliminating aggressive sales tactics.

No Technical Experience Required

CanIPhish is designed with a focus on user-friendliness, ensuring ease of use without needing advanced technical skills. Supported by a detailed knowledge base, it empowers users to take control confidently.

Fresh Content & Regular Updates

We're always tuned in to the latest in cyber security trends and threats, regularly updating our content and functionality to keep it fresh and relevant. This ensures your organization stays ahead with the most current security awareness resources.

Subscription Flexibility

Choose from our flexible monthly or heavily discounted annual subscription plans to suit your organization's needs. Our subscription model is designed for easy management and adaptability.

Powerful, Fully Equipped Platform

Equipped with powerful features like Single Sign-On, Dark Web Monitoring, Automated reporting and Domain Spoofing, our fully managed infrastructure ensures your organization is primed for elevating its security awareness from day one.

Welcome to CanIPhish, let's get you started!

To send your first simulated phishing or security awareness training campaign, simply follow the below steps:

[Watch Full Demonstration](#)

[Explore Phishing Material](#)

STEP 1. Import Your Employees

STEP 2. Setup Email Allowlisting

STEP 3. Launch A Phishing Campaign

It's time to begin sending!

Before scheduling an organisation-wide simulated phishing or security awareness training campaign, make sure to send yourself a test to verify everything is working as intended. If in doubt, watch our demonstration!

COMPLIANCE STANDARDS

GDPR Compliant

CanIPhish has updated its Privacy Policy to meet GDPR requirements, ensuring only essential data is collected for providing our service.

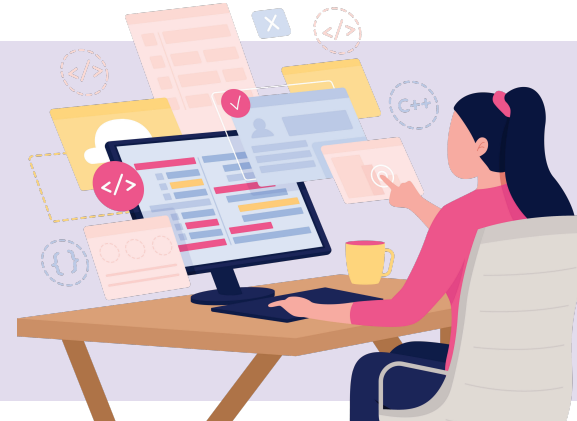

SOC 2 Type 1

AssuranceLab an AICPA-certified audit firm, finalized the SOC 2 Type 1 Attestation Report of the CanIPhish Cloud Platform on the 14th of June 2023

Flexible. Scalable. User-Centric.

Ultra-Realistic Phishing Simulations

KEY FEATURES

80+ Email Templates

Designed to simulate various real-life attack scenarios, these ultra-realistic phishing emails are an effective tool for preparing your employees for the threats they may encounter.

50+ Phishing Websites

Leverage our collection of phishing websites meticulously designed to replicate the appearance of genuine sites. These realistic simulations are designed to entice employees to interact with them.

Platform-Wide Phishing Statistics

We share aggregated statistics to indicate the potency of the phishing email. From the obvious to the highly undetectable, our platform provides a range of scenarios for tailored training experiences.

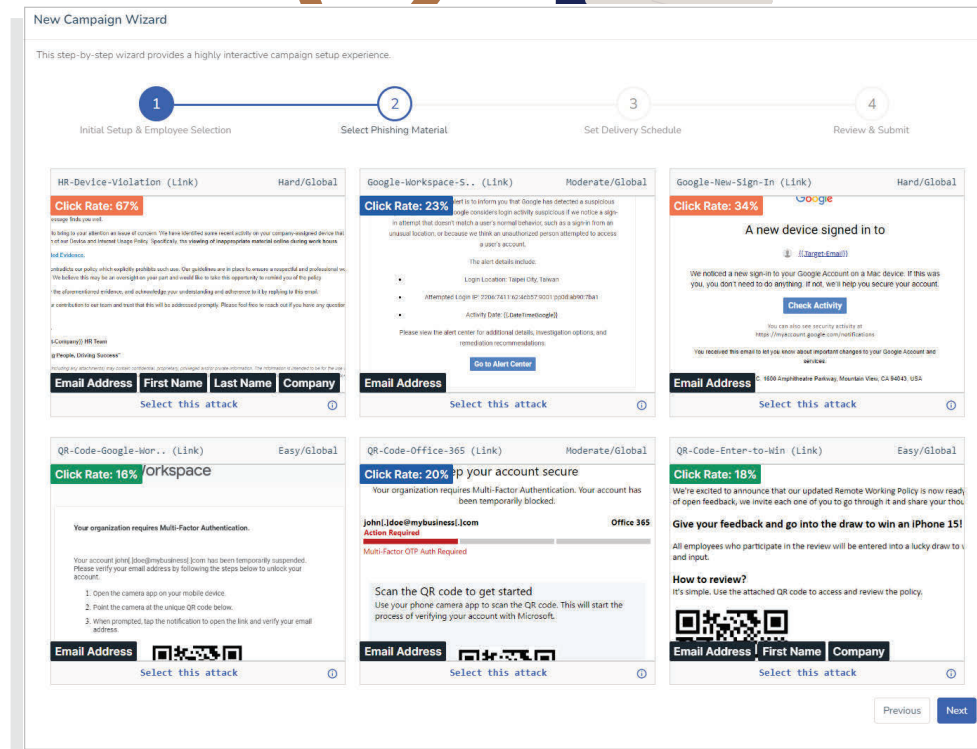

Customizable Content

Enhance your experience with our customizable phishing content, or take it a step further by creating your own! Our platform offers flexibility and creativity in designing bespoke phishing tailored for your organization.

Sender Profiles & Domain Spoofing

Elevate your phishing simulations with custom sender profiles and domain spoofing capabilities. Create authentic-looking phishing campaigns that test and strengthen your organization's defenses against sophisticated threats.

70+ Languages

With our advanced multi-language support, you can create phishing campaigns in over 70 languages, ensuring a comprehensive and inclusive cybersecurity training experience for your globally diverse workforce.

Comprehensive. Sophisticated. Effective.

Cutting-Edge

Security Awareness Training

KEY FEATURES

25 Micro-Learning Training Modules

Our expanding in-house collection features expertly designed training modules. Each includes a brief video and combines educational content with quiz-based learning.

On-The-Spot Learning

The most effective time to learn is those precious seconds after clicking on a phishing. Users are redirected to an interactive landing page, quickly educating them on how to spot and avoid future phishing attempts.

Customizable Content

Tailor your learning journey by creating your own modules with our user-friendly training module editor. Take control and personalize your experience.

Gamification

CanIPhish infuses education with an addictive mix of competition and accomplishment, turning it into an exciting adventure. Our approach, featuring leaderboards, badges, and certificates, effectively resolves user engagement issues.

Learner Dashboard

Employees have access to a personal dashboard where they can complete training modules, view their badges, check their training statistics, and download certificates of completion.

Learner Dashboard: craig@cyberducks.com

[Log out](#)

Average Score: 100%

Assigned Trainings: 0

Completed Trainings: 2

Badge Score: 235

Badges Achieved

Your badge score is higher than 90% of other learners! [Looking to earn more badges?](#)

Training Module	Estimated Time	Passing Score	Personal Best
No trainings assigned.			

Completed Training

Training Module	Personal Best	Completion Date	
Device-Security	100%	02 November 2023	Download Certificate
Financial-Industry-Best-Practices	100%	01 November 2023	Download Certificate

Employee Metrics

CanIPhish meticulously tracks every employee interaction to construct a comprehensive profile of their phishing risk, badge score, and security IQ. This data helps identify organizational vulnerabilities and strengths.

Educational. Data-Driven. Engaging.

CanIPhish Reviews

What Our Customers Are Saying

Overall, I highly recommend CanIPhish to any organisation looking for a comprehensive and customisable security awareness training platform. Their expertise and commitment to customer satisfaction make them a valuable partner to our organisation.

Zhuang T

Senior Security Analyst in New Zealand

CanIphish is a very simple to use tool that has world class simulated phishing tools. Even someone without IT knowledge can run simulated phishing tests without any problems. Also, the customer service is fantastic!

David

System Administrator in Australia

What I liked most about CanIPhish is its user-friendly interface and powerful phishing detection capabilities. It provides an easy way to assess and improve cybersecurity by identifying potential phishing threats. The detailed reports and real-time alerts ensure that I can take swift action to protect my online security. CanIPhish is a valuable tool for anyone concerned about phishing attacks.

Zahri

Managing Director in United Arab Emirates

Phishing testing and training for users is critical to enterprise security these days. CanIPhish provides a clean, easy-to-use system without breaking our bank.

Glenn

IT Manager in US

Very easy to use product and support is 10 out of 10!

Denis

Info Sec Engineer in UK

Trusted. Valuable. Easy-To-Use.
