

# Partner Datasheet

## Scalable. User-Friendly. Flexible.

Designed for MSPs, MSSPs, vCISOs, and Red Teams, CanIphish delivers ultra-realistic phishing simulations and security training that seamlessly integrate into your commercial offering.

With advanced features like conversational email and voice phishing, CanIphish boosts your offerings and helps you attract a broader customer base—without the complexity and high costs of legacy platforms.

### White-Labeled Platform

Use your own domain, logos and banners, hiding any reference to CanIphish. This Enterprise feature is offered to partners at no cost.

### Seamlessly Scale

Manage your customers from a single tenant or create multiple with the ability to synchronize or switch between them as needed.

### Partner Pricing

Along with volumetric discounting, our partners receive an additional discount off retail pricing on all subscriptions (enquire for details).

### Customer Management Dashboard

Manage all your customers with an intuitive dropdown menu that allows you to quickly onboard customers and switch between tenants seamlessly.

### Try Before You Buy

Get full access to partner-exclusive features for 14 days and discover just how easy it is to start managing customers at scale.

### Aggregated Billing

With a Single Master Subscription, you get aggregated billing and an allocation table to assign licenses to subtenants as needed. You decide how and what to charge your customers.

## How Much Does It Cost?

We keep it simple. You only pay the regular subscription fees. There are no hidden charges, surprise costs, or complicated pricing structures.

## What Are The Subscription Requirements?

To access partner features, you'll need an Enterprise Tier subscription with at least 100 users.

## Can I Try It First?

Of course. You'll get a 14-day free trial with full access, so you can see exactly what's on offer before you subscribe.

“

Guided by scalability and simplicity, our partnership model ensures a powerful, cost-effective solution without hidden fees or complications.
